Authors Classified	75
Nativity of Authors	107
Titles of Selections	129
Index to Poetical Selections	213
Analytical Index to Prose Selections	251
Bibliographical Index	303
Synchronistic Review	593

INTRODUCTION TO THE INDEX.

I have come to regard a book as curtailed of half its value if it has not a pretty full index.— BINNEY.

FOR a work of such wide scope as THE LIBRARY OF UNIVERSAL LITERATURE a comprehensive index is indispensable. Though the work is encyclopedic in character, and for this reason arranged alphabetically for convenient reference to authors, it is more than an encyclopedia of writers. Were the articles limited to biographies this alphabetical arrangement would answer the purpose of the most exacting student.

But in the compilation of this work the editors have done more. They have classified the writers according to their works, made selections from their best books, and culled opinions from able contemporary and subsequent critics to show their relative merits. Many who are known to the world in general as romancists have, on the close scrutiny to which they have been subjected during the compilation of this work, been found to have produced poetry, critical essays, or contributions to science or history which might have made them famous in those lines had not their greater works overshadowed others of real merit. Many a noted philosopher might be considered a great wit could we but lose sight of his sage sayings. In classifying the various authors it has therefore been found necessary frequently to place the same name under several headings, so the inquirer may not be at a loss to find the name of a poet under the

proper classification, even though he also be known as a novelist. This section of the index will be found of great value to anyone searching for writers in the several departments of literature.

The collection of selections from the principal works of the authors represented would lose more than half its value without being indexed. It will be found by reference to this index that many subjects are treated of by different authors in different parts of the work, and where one might scarcely expect to find them without such reference. The selections also comprise much biographical matter and critical opinions of authors not found in the regular aphabetical order. For the purpose of compiling theses, essays or sermons, or for strengthening one's own opinions by getting the matured thoughts of others on the same questions, it will be readily seen that this section of the index is invaluable.

Though the title of each selection has been written with a view to suggesting the tenor of the article, it frequently transpires that the heading (often the author's own and selected at his caprice) indicates neither the character of the writing nor the subject treated. The editors thought it expedient therefore to further set forth the titles to the prose selections in an Analytical Index, wherein the selections are grouped under several general headings, to indicate either the subject-matter or the rhetorical character of the writings. In arranging the index to the selections of poetry, in which the work is exceptionally rich, the reader will find verses suitable for quotation on various occasions and on the subjects usually sung of by the bard, such as "Love," "Patriotism," "Death," etc.

The "Nativity of Authors," and a complete list of the pseudonyms of the authors listed in this work, are also features of great value.

The Index of Bibliography is a compendium of the world's literature. What studious reader has not felt the necessity of such a work! It is evident that to read all the works on one subject (unless it be a trifling one) is impossible, even for a specialist. But by reference to this Bibliographical Index the choice of several may be made, and possibly one by an author acknowledged to be the master in his line.

Description of the Index is not complete without a brief reference to the synchronistic charts. As chronology is the framework of history, so synchronology is the skeleton of literature. The value of many a book is determined by the circumstances under which it was written. A careful study of these tables will disclose the gradual unrolling of the scroll of literature in the light of civil and political history, as well as the effect on literature of the world's progress.

ALPHABETICAL LIST OF AUTHORS.

A.	Vol.	Page.
Abbot, Ezra	1	13
Abbott, Charles Conrad	1	16
Abbott, Jacob	1	20
